TO OUR KIND FRIENDS
AND PATRONS.....

We beg to call attention to the following points:

First—That most of the bulbs, plants and seeds on this list are imported from distant countries—Japan, Europe, Australia, etc.—therefore, it requires some time for the order to be transmitted, be collected there, and received here by us. Hence, it is **indispensable** that we should have **early orders**.

It is safe to send us orders through the summer for **fall** and **spring delivery**.

..Observe When Ordering..

TERMS

To customers of approved credit, 60 days, unless otherwise agreed. Special discounts of 2 to 5 per cent. on **cash with order**, or on any account paid within ten days from date of invoice.

REFERENCES

Must be given by any new customer sending us an order desiring to open an account. If delays in shipments by long correspondence are to be avoided, send **cash**. All C.O.D. orders must be accompanied by part cash. Send no **Personal Checks** unless known to us, but send Money Order, Post or Express, or Bank Check. **Examine and count** stock immediately on receipt. We will not consider any complaints made later than one week from receipt of stock.

RESPONSIBILITY

While we have for **twenty-two years** supplied the **best** the market affords, we give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of the **bulbs** or **plants** we send out, and will not be in any way responsible for the crop. Every order received for goods named on the within list must be accepted on these conditions, or the goods at once returned.

PRICES

Are subject to change without notice.

...FORCING AND OTHER BULBS...

Read Carefully.

1. We guarantee to supply none but the very best in this line; no diseased, unsound or cheap Auction stuff;
 2. We supply *True to Name or Color*, full size and count;
 3. Liberal discount when larger quantities are ordered.
- EASTER, 1901**, will be early. We urge *early orders* to secure early deliveries from first shipments.

DUTCH HYACINTHS.

(September.)

We will handle a superior grade of these this season, having secured our stock from one of the best and most

reliable growers in Holland. We recommend our bulbs, especially for *best blooming* qualities.

Mixed. In separate colors of equal quantity.

This grade is especially adapted for bedding, although used for forcing by many florists.

SINGLE MINIATURE HYACINTHS.

Dutch Romans—August-September.

This grade of Hyacinths is deservedly becoming more and more popular. They are the most valuable in succession to the French Romans, and can be had in bloom from January to May. For cut flowers, or growing half a dozen in pans, they make most salable stock, and produce fine large flower spikes very nearly equal to the second-size named Hyacinths. We furnish them *under names*, being *far superior* to the ordinary mixed grade. Varieties we catalogue produce the largest flower spikes and force the easiest.

JAPAN FERN BALLS. (*Davallia bullata*).

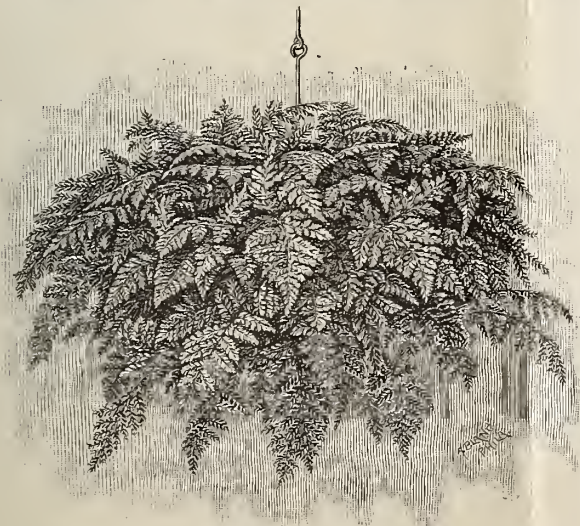

We were the first house to introduce these into United States, in 1878. Last season we imported many thousands of them, but the supply fell far short of the demand. They have been found by florists to be one of the best paying investments. They are perfectly hardy; actual hard freezing does not injure them. They take but little space, as they can be suspended from rafters of greenhouse. Delivery, December-March.
